

## The StrongArm® Difference

- **Innovative Design:** Helps shift the weight from the wrist to the forearm providing additional stability and control.
- **Self-Standing Base:** Larger "footprint" greatly improves traction and overall stability while keeping StrongArm right by your side.
- **Strong & Lightweight:** Feather-light aluminum construction, yet still supports up to 500lbs!
- **Perfect Fit & Height:** 12 total adjustment settings provides the ideal height for maximum comfort.

Traditional walking canes put stress on wrists and lack key features that provide proper support, stability, and comfort...

### THE PROBLEM

VS

### THE SOLUTION

Weak Wrists

Forearm Cradle  
Stabilizes The Wrist

Unable To Sit or Stand

Stand Assist Helps  
In & Out Of Chairs

Fear of Falling

Outstanding Stability  
Boosts Confidence

Causes Bad Posture

Encourages Good  
Posture & Alignment

Insufficient Support

Designed For  
Optimal Support

## Stand With Independence

When standing from a seated position StrongArm's® unique design offers a hand up without the need to push off an armrest or struggle to find your balance as you stand.
