## CanDo® pedal exercisers

use for legs

use for arms

shown on Dycem® non-slip pads (sold separately on page 199)

- portable bi-directional upper- and lower-body pedaling
- wide leg spread and rubber non-marring feet keep exerciser stable
- use wraparound adjustable straps to secure feet or arms
- adjust resistance by turning tension knob clockwise towards "High" to increase difficulty or counter clockwise towards "Low" to reduce difficulty

adjustable resistance knob

## CanDo® pedal exerciser with handle

- removable handle provides added stability while using the pedal exerciser
- can be used as upper- or lower-body exerciser
- four anti-slip rubber pads prevent sliding and protect floor
- safe and gentle form of low impact exercise
- stimulates circulation
- ideal for toning leg muscles
- tension can be adjusted
